

## **JOB ANNOUNCEMENT:**

### Civil Engineering Paid Internship

#### **OVERVIEW:**

The Nicholson Construction Company Operations Department welcomes your interest! Our goal is to provide engineering input and support to the operations groups within the company.

The role of a **Civil/Geotechnical/Structural Intern** is to learn and master the provisions of technical, quality control and administrative support to Superintendents and Project Managers on jobsites within a Nicholson Construction Company district. In this position your responsibilities could include:

- Ensuring that all company and OSHA safety regulations are met and enforced.
- Assisting with field Quality Control tests and prepare/manage Quality Control and production records.
- Assisting with technical tasks like water testing, and load testing, etc.
- Researching and resolving drawing interpretation problems, conflicts, interferences and errors, update "as built" drawings.
- Assisting in preparation of change order documentation and claim analysis including any supporting estimates, change orders and estimates.
- Performing field surveys.

#### **QUALIFICATIONS:**

- Working toward a 4 year engineering or related degree.
- Basic civil engineering knowledge and desire to obtain working experience in the use of construction equipment/techniques, drawings, specifications, building materials, surveying, design, or geotechnical work.
- Understand basic principles of design.
- Has sufficient skill with MS Word and Excel to make logical reports, data reduction, and graphs.
- Can functionally use AutoCAD Lite.
