

JOB ANNOUNCEMENT:

Diesel Mechanic

OVERVIEW:

The Nicholson Construction Company Plant Operations welcomes your interest! Our goal is to provide engineering input and support to the operations groups within the company. The role of a **Diesel Mechanic** is to maintain and repair construction equipment, diagnose/repair diesel engine and hydraulic system problems, and load/unload trucks carrying construction equipment. In this position your responsibilities will include:

- Repair and set-up of construction equipment to prepare for projects.
- Modifying equipment to meet project requirements through an understanding of diesel and hydraulic mechanics.
- Working with equipment maintenance foreman and other technicians to design and build new and/or to improve construction equipment.
- Other duties as assigned.

QUALIFICATIONS:

- High School Diploma or GED.
- Four years experience as a heavy equipment mechanic. Driver's License - Class C.
- Ability to take direction but also to work independently.

ADDITIONAL QUALIFICATIONS:

- Knowledge of diesel or hydraulic mechanics.
- Hydraulic and Mechanic Certification.

If you are interested in applying for this position, send your resume and salary requirements to careers@nicholsonconstruction.com or fax to 412.221.4548, Attn: HR Department.
